"A fascinating look at how scientists are working to help doctors treat the aging process itself, helping us all to lead longer, healthier lives." —Sanjay Gupta, MD
Aging—not cancer, not heart disease—is the underlying cause of most human death and suffering. The same cascade of biological changes that renders us wrinkled and gray

also opens the door to dementia and disease. We work furiously to conquer each individual disease, but we never think to ask: Is aging itself necessary? Nature tells us it is not: there are tortoises and salamanders who are spry into old age and whose risk of dying is the same no matter how old they are, a phenomenon known as "biological immortality." In *Ageless*, Andrew Steele charts the astounding progress science has made in recent years to secure the same for humans: to help us become old without getting frail, to live longer without ill health or disease.

own internal fountain of youth waiting to be discovered? Yes, yes, and YES! says Suzanne Somers, the bestselling author of *The Sexy Years*. It can all be true when you take advantage of the science of antiaging medicine—a revolutionary approach to achieving the ageless life. Suzanne Somers has already introduced millions of women to bioidentical hormone replacement therapy and changed the way we look at menopause. Now, in *Ageless*, Suzanne introduces an inspiring, medically validated approach to reversing the aging process and maintaining a healthy, vibrant, mentally sharp, sexually active

life—while building the body's natural defenses against age-related diseases.

Suzanne talks about:

- How antiaging medicine can help detox the body of harmful pollutants and chemicals and strengthen our weakest glands and organs
- The dangers of perimenopause and how women can treat it
- Why so many hysterectomies are unnecessary, how birth control pills may have contributed to the rise of hysterectomies, and how to restore your body to perfect hormonal balance after having one
- How andropause is a real condition for men, and how men can lose weight, regain their youthful physiques, and

restore health, energy, and sexuality, all through bioidentical HRT • The importance of sleep and the healing work that nature does during this time to balance hormones and increase energy In this "antiaging bible," Suzanne brings together prominent, Western-trained antiaging doctors to show how the traditional medical approach is woefully inadequate. Its standard of care has been to treat all symptoms with drugs, but in Ageless you will find out how this approach does not make us better. With antiaging medicine you can heal your body rather than keep a chronic condition at bay with drugs. Ageless shows

you how to keep your "insides" young, and how this manifests on the outside.

What does being younger mean to you? Perhaps it's lifelong good health, free of the illnesses often associated with aging—such as heart disease, diabetes, osteoporosis, and cancer. It could be an agile mind, sharp vision, or smooth, wrinkle-free skin. Or maybe it's a fit body—lean, strong, and flexible, with energy to spare. However you define it, being younger is within your grasp. Follow the program in *Prevention Positively Ageless*, and you'll begin to see

measurable improvements in key biomarkers of aging in as little as 4 weeks. At the heart of the program are daily menus and recipes featuring nutritious, antioxidant-rich foods—the kind that actually help prevent and repair the cellular damage that causes premature aging. Handy charts allow you to see at a glance which foods have the greatest protective potential according to their ORAC scores, a revolutionary system for evaluating and comparing their antioxidant activity. Prevention Positively Ageless also offers hundreds of self-care strategies, all culled from the latest and best scientific research,

A paranormal women's fiction cozy mystery - because midlife can be a real witch! There are a lot of things people never told you about being forty-something. Sure, they mentioned the hot flashes and reading glasses and the need for Kegels, but they never talked about fireballs sprouting from your fingertips or your sudden ability to turn rat-bastards into, well, actual rats. Which is why it comes as something of a surprise to Juniper when—at the tender age of 46—she discovers that not only has she inherited a quirky house in an even quirkiest town called Miracle Bay from a relation she had no idea

existed, but she also develops magical powers. Because, apparently, she's a witch. Something her parents sort of forgot to tell her. With her life turned upside down, a new start in a new town is just what Juniper needs, and the strange bookstore her grandmother left her might be exactly the right opportunity. But beyond her inheritance and sudden affinity for tarot cards, there's something strange afoot in Miracle Bay. A mystery Juniper is determined to solve before her newfound freedom vanishes along with her life.

"A startling chronicle by a brilliant young scientist takes us onto the frontiers of the science of aging, and reveals how close we are to an astonishing extension of our life spans and a vastly improved quality of life in our later years. Aging--not cancer, not heart disease--is the true underlying cause of most human death and suffering. We accept as inevitable that as we advance in years our bodies and minds begin to deteriorate and that we are ever more likely to be felled by dementia or disease. But we never really ask--is aging necessary? Biologists, on the other hand, have been investigating that

question for years. After all, there are tortoises and salamanders whose risk of dying is the same no matter how old they are. With the help of science, could humans find a way to become old without getting frail, a phenomenon known as "biological immortality"? In *Ageless*, Andrew Steele, a computational biologist and science writer, takes us on a journey through the laboratories where scientists are studying every bodily system that declines with age--DNA, mitochondria, stem cells, our immune systems--and developing therapies to reverse the trend.
