Acces PDF Chapter 10 Blood Anatomy Physiology

Answer Key
Blood is composed of a nonliving fluid matrix (plasma) and formed elements (Figure 10.1). It is scarlet to dull red, depending on the amount of oxygen carried. Normal adult blood volume is 5 to 6 liters. Dissolved in plasma (primarily water) are nutrients, gases, hormones, wastes, proteins, salts, and so on. Plasma composition changes as body cells remove or add substances to it, but homeostatic mechanisms act to keep it relatively constant.

Chapter 10: Blood - Anatomy and Physiology Homepage

- Blood is red- bright red

Acces PDF Chapter 10 Blood Anatomy Physiology

Answer Key
if well oxygenated on the way to tissue from the lungs) dark reddish blue if oxygen deplete (on the way back to lungs from tissue) - blood is thicker than water because it contains proteins and cells- it feels slightly oily and sticky for the same reason.-Blood is slightly alkaline: ph average about 7.40. water is 7.0

The pH of blood averages about 7.4; however, it can range from 7.35 to 7.45 in a healthy person. Blood is therefore somewhat more basic (alkaline) on a chemical scale than pure water, which has a pH of 7.0. Blood contains numerous buffers that actually help to regulate pH. Blood constitutes approximately 8 percent of adult body

Blood . . . Key

If you want to download the image of Chapter 11 the Cardiovascular System Worksheet Answer Key and Charmant Anatomy and Physiology Chapter 10 Blood Worksheet Answers, simply right click the image and choose "Save As". Back To Chapter 11 The Cardiovascular System Worksheet Answer Key.

Chapter 11 the Cardiovascular System Worksheet Answer Key . . .

Blood pumped by the heart flows through a series of vessels known as arteries, arterioles, capillaries, venules, and veins before

Acces PDF Chapter 10 Blood Anatomy Physiology

returning to the heart.

Arteries transport blood away from the heart and branch into smaller vessels, forming arterioles.

Arterioles distribute blood to capillary beds, the sites of exchange with the body tissues.
