For most of America's history, we simply did not lock people up for migrating here. Yet over the last thirty years, the federal and state governments have increasingly tapped their powers to incarcerate people accused of violating immigration laws. As a result, almost 400,000 people annually now spend some time

countries. To sharpen awareness of contrasting developments across the region, the book's country chapters are organised into geographic sections that reveal how variations in migration pressures have in some cases resulted in contrasting detention practices even as the EU directives have sought to

A critical focus of the book are the evolving domestic norms related to grounds for detention, length of detention, non-custodial "alternatives to detention," the treatment of children, and conditions of detention. With its systematic and comparative assessment of immigration

primary focus of the volume is to understand how children and youth encounter, move through, or are outside of a range of legal processes, including border enforcement, immigration detention, federal custody, courts, and state processes of categorization. Even if young people do not directly interact with
