New communication technologies are being introduced at an astonishing rate. Making sense of these technologies is increasingly difficult. Communication Technology Update is the single best source for the latest developments, trends, and issues in communication technology. Now in its 10th edition, Communication Technology Update has become an indispensable information resource for business, government, and academia. As always, every chapter has been completely rewritten to reflect the latest developments and market statistics, and now covers mobile computing, digital photography, personal computers, digital television, and electronic games, in addition to the two dozen technologies explored in the previous edition. The book's companion website ([www.tfi.com/ctu](http://www.tfi.com/ctu)) offers updated information submitted by chapter authors and offers links to other Internet resources. \*Provides students and professionals with the latest information in all areas of communication technologies \*The book's companion website offers updated information to this text, plus links to related industry resources \*New and rewritten chapters covering Telephony (with full coverage of VoIP); Podcasting and Internet Video Distribution; WiFi, Broadband, and Mobile computing; and coverage of other emerging technologies, as well as fully updated statistics for all technologies

Reclaiming Education for Democracy subjects the prophets and doctrines of educational neoliberalism to scrutiny in order to provide a rationale and vision for public education beyond the limits of No Child Left Behind. The authors combine a history of recent education policy with an in- depth analysis of the origins of such policy and its impact on professional educators. The public face of these policies is separated from motives rooted in politics, profit, and ideology. The book also searches for new insights in understanding the neoliberal and managerialist assault on education by examining the psychology of advocates who demonstrate a special animus toward universal public education. The manipulation of public education by No Child Left Behind is a case study in the general approach to public institutions taken by the politicians and theorists in these camps. K-12 education has been subjected to deceptive descriptive analyses, marginalization of its professional leadership, manipulation of its goals, the imposition of illegitimate quality markers, a grab on its resources by corporate profiteers, and a demoralization of its rank and file. This book helps us think beyond this new commonsense of education. Recipient: 2009 AERA Division K Award for Exemplary Research in Teaching and Teacher Education

Worlding brings ideas about "virtual" places and societies together with perceptions about the "real" world in an era of mounting global uncertainty. As mass media and the Internet consume ever-increasing portions of our lives, are we becoming disengaged from face-to-face human interaction and real-world concerns? Or is the virtual world actually bringing people closer together and making them more involved with social issues? Worlding argues that the "virtual" and the "real" are profoundly interconnected, often in ways we don't fully appreciate. Drawing on sociology, cultural studies, philosophy, media analysis, and technology studies, Worlding makes the argument that virtual experience and social networking can be vital links to utopian visions and an appreciation of the world's diversity.

Big changes have been taking place in reading in recent years. While American society has become more visual and digital, the general state of literacy in America is in crisis, with educators and public officials worried about falling educational standards, the rising influence of popular culture, and growing numbers of non-English-speaking immigrants. But how justified are these worries? By focusing on «reading», this book takes a serious look at public literacy, but chooses not to blame the familiar scapegoats. Instead, *The End of Reading* proposes that in a diverse and rapidly changing society, we need to embrace multiple definitions of what it means to be a literate person.

□Helen Caldicott has the rare ability to combine science with passion, logic with love, and urgency with humor.□ □Naomi Klein From the leader and spokeswoman of the antinuclear movement comes a revised and updated edition of this groundbreaking, widely acclaimed classic. Exploring dangerous global trends such as ozone depletion, global warming, toxic pollution, food contamination, and deforestation, Helen Caldicott presents a picture of our world and the forces that threaten its existence. As always, she gives a prescription for a cure and cause for hope, rallying readers to action with the contention that our fight for the planet will draw its strength from love for the Earth itself.
