**Heron's Formula Word
Problems With**

Heron's formula states

that the area of a

triangle whose sides

have lengths a , b , and c

Where To Download

is: $S = s(s-a)(s-b)(s-c)$
 $S = \frac{1}{4} \sqrt{(2s-a)(2s-b)(2s-c)(2s)}$,
where $s = \frac{a+b+c}{2}$.

$s = \frac{2a+b+c}{2}$ is the
semiperimeter (half
perimeter) of the
triangle .

Here we are going to see
some example problems

Where To Download

to find the area triangle using herons formula. If a, b and c are the sides of a triangle, then. the area of a triangle = $\sqrt{s(s-a)(s-b)(s-c)}$ sq.units. where $s = (a + b + c)/2$. 's' is the semi-perimeter (that is half of the perimeter) of the triangle.

Maths – Area of Triangle: Heron's Formula Application Word ...

Where To Download

$2s = a + b + c$. $2(s - a) =$
 $-a + b + c$. $2(s - b) = a -$
 $b + c$. $2(s - c) = a + b -$
 c . There is at least one
side of our triangle for
which the altitude lies
"inside" the triangle. For
convenience make that
the side of length c . It
will not make any
difference, just simpler.
Let $p + q = c$ as
indicated.

Problem Solving with Heron's Formula

A triangle has perimeter 14 and area $2\sqrt{14}$.

If the shortest side has length 3, find the positive difference between the lengths of other two sides. Give your answer to 3 decimal places.

Area of Triangles - Heron's Formula

Practice Problems ...

Step 2. Substitute S into the formula. Round answer to nearest tenth.

$$A = \frac{1}{4} \cdot 4.5(4.5 + 3)(4.5 + 2)(4.5 + 4)A =$$

$\approx 8.4375A \approx 2.9$. Since Heron's formula relates the side lengths, perimeter and area of a triangle, you might need to answer more challenging question types like the following

8 Heron's Proof...

Heron's Proof n The
proof for this theorem is
broken into three parts.
n Part A inscribes a
circle within a triangle
to get a relationship
between the triangle's
area and semiperimeter.

Where To Download

n Part B uses the same circle inscribed within a triangle in Part A to find the terms $s-a$, $s-b$, and $s-c$ in the diagram. n Part C uses the same diagram with a quadrilateral

Heron's Formula for Triangular Area

You can calculate the area of a triangle if you know the lengths of all

Where To Download

three sides, using a formula that has been known for nearly 2000 years. It is called

"Heron's Formula" after Hero of Alexandria (see below) Just use this two step process: Step 1: Calculate "s" (half of the triangles perimeter):
 $s = \frac{a+b+c}{2}$ 2. Step 2: Then calculate the Area:
