...the relationship between employment growth and output growth...is greatly affected by the functioning, efficiency and institutional structure of the labor market. --Joseph Stiglitz, Chief Economist Despite the resumption of economic growth in most LAC countries since the late 1980s, improvements on the employment/unemployment front have been sluggish at best, with a few notable exceptions. In many countries, renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment, and to restore wages to pre-crisis levels. The focus of this book is on: • the performance of labor markets in the LAC region since the beginning of significant structural reforms most countries in the region have undertaken • the structure of labor markets, institutions, and incentive structures; • the effects of that structure on employment, earnings, income distribution, and poverty levels; • the role of labor market institutions in labor market trends; • the options for reform and the benefits of comprehensive labor reforms, as evidenced inside and outside the region; • labor policy reforms to improve in a sustainable way the employment/unemployment outlook.

Sheryl McCorry is a woman in a million. In her bestselling memoir *Diamonds and Dust* and its follow up *Stars over Shiralee*, Sheryl shared her amazing life story from a childhood in the Top End to mustering cattle in the outback to becoming the first woman in the Kimberley to run two million-acre cattle stations. In *Love on Forrest Downs*, Sheryl's inspiring story continues as she and her soulmate Michael battle to keep their cattle property running. With her characteristic down-to-earth honesty, Sheryl reveals more stories of hardship and humour from her incredible life in the bush. And with the courage we have come to admire her for, Sheryl fights on to preserve the country she so loves and protect her family from the forces that would tear them apart. A story of resilience and triumph, here at last on *Forrest Downs*, Sheryl has found the happiness she so deserves.

New York Times bestselling author and Printz Award winner Walter Dean Myers once again connects with teenagers everywhere in *Darius & Twig*, a novel about friendship and needing to live one's own dream. This touching and raw teen novel from the author of *Monster*, *Kick*, *We Are America*, *Bad Boy*, and many other celebrated literary works for children and teens is a Coretta Scott King Honor Book. Darius and Twig are an unlikely pair: Darius is a writer whose only escape is his alter ego, a peregrine falcon named Fury, and Twig is a middle-distance runner striving for athletic success. But they are drawn together in the struggle to overcome the obstacles that life in Harlem throws at them. The two friends must face down bullies, an abusive uncle, and the idea that they'll be stuck in the same

place forever. Maria Russo, writing in the New York Times, included Darius & Twig on her list of "great kids' books with diverse characters." She commented: "The late Myers, one of the greats and a champion of diversity in children ' s books well before the cause got mainstream attention, is at his elegant, heartfelt best in this 2013 novel. It ' s about two friends growing up in Harlem, one a writer, one an athlete, facing daily challenges and trying to dream of a brighter future."

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.
